

C-41 RA Minilab Chemistry

RT/CPAC C-41 Developer starter

RT/CPAC C-41 Developer Starter is used to prepare a working tank solution for all RT/CPAC C-41 developer replenishers. The easy-to-follow instructions for adding the proper amounts of starter, water and replenisher can be found on the mix instructions of the replenisher kit.

Catalog Number	Mix Size	Shipping Weight
55DE5101	1 L conc.	1.25 kg
55DE51016	6 x 1 L conc.	7.66 kg

RT/CPAC C-41 LR Developer Replenisher

This developer is formulated for all C-41 type minilab processes including the C-41RA process, and it is extremely stable even in low utilization conditions. Its low replenishment rate helps minimize effluent and processing costs. For convenience, C-41 LR is an easy-to-mix, three-part liquid concentrate.

Catalog Number	Mix Size	Shipping Weight
55DE5102	2 x 10 L	3.15 kg
55DE5104	4 x 10 L	6.98 kg
55DE5103	1 x 50 L	8.20 kg

Specifications :

- Time : 3' 15"
- Temperature : 37,8°C +/- 0.2
- Replenishment rate*: 23 ml/film (135x24exp.)

RT/CPAC CN-41 Bleach III Starter

This non-foaming solution is used for all RT/CPAC Bleaches that require a starter to adjust working tank pH. The easy-to-follow instructions for adding the proper amounts of starter, water and replenisher can be found on the mix instructions of the replenisher kit.

Catalog Number	Mix Size	Shipping Weight
55BL5201	1 x 1 L conc.	1.15 kg
55BL52016	6 x 1 L conc.	7.65 kg

(*) Actual replenishment rate will depend on utilization, processing environment and film population

RT/CPAC C-41 RA Odorless Bleach III NR Replenisher

Another CPAC innovation...this completely odor free bleach is designed for use with all C-41 RA processes. Odorless CN-41 RA Bleach delivers process integrity identical to the standard product, without the offensive odors. It is formulated to reduce bleaching time to 45" without concern for sensitivity to retained silver or leuco cyan dye. RT/CPAC CN-41 RA Bleach does not require mixing with water, thus it is ready-to-use.

Catalog Number	Mix Size	Shipping Weight
55BL5212	2 x 5 L	13,0 kg

Specifications :

- Time : 0' 45"
- Temperature : 35 - 41°C
- Replenishment rate*: 5 ml/film (135x24exp.)

RT/CPAC C-41 RA Fixer & Replenisher

RT/CPAC CN-41 RA Fixer is specifically formulated for use in the C-41 RA process. This one part, easy-to-use concentrate complements the RT/CPAC CN-41 RA Odorless Bleach III NR Replenisher. The CN-41 RA Fixer drastically reduces the crystallization experienced with other products.

Catalog Number	Mix Size	Shipping Weight
55FX5312	2 x 10 L	12,8 kg
55FX5313	1 x 50 L	31 kg

Specifications :

- Time : 1' 30"
- Temperature : 35 - 41°C
- Replenishment rate*: 33 ml/film (135x24exp.)

RT/CPAC C-41 ML FF Stabilizer & Replenisher

RT/CPAC ML FF Stabilizer offers excellent dye stability, reduces water spotting, and is effective in any wash or washless C-41 film process. This one-part liquid concentrate makes both a working tank and replenisher solution.

Catalog Number	Mix Size	Shipping Weight
55ML5412	12 x 10 L	1,8 kg

Specifications :

- Time : 1' 00" – 2' 20"
- Temperature : 32 - 40°C
- Replenishment rate*: 33 ml/film (135x24exp.)

(*) Actual replenishment rate will depend on utilization, processing environment and film population
